

HMKSB-17

Type: KSB Pump Seal
Replacement: Suit KSB Pumps
Temperature: -20 to +200°C
Pressure: ≤ 0.8 Mpa
Speed: ≤ 3000 r/min
Material : Q1,Q2,U2,T,V,M1,F,G,M

*Product description

KSB pump mechanical seals, built-in, single end, large spring, non-balance, combined coil spring transmission, pump shaft rotation and spring rotation.

*Apply to the host

HMKSB Company

*Product features

Built-in type, single end surface, large spring, non-balance type, combination coil spring drive, pump shaft rotation and spring rotation.

*Product parameters

Pressure: 0-0.8 Mpa
Temperature: - 20-200 °
Speed: ≤ 3000 r/min

*Applicable industries:

This HMKSB mechanical seals are suitable for bearing, pump, kettle, cylinder, corrosion resistance, high temperature resistance, high pressure resistance, wear resistance.
